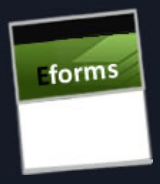
INFORMATION BROCHURE FOR EFORMS

Online Application Portal

Powered By

SPLASHERS TECHNOLOGIES



“ Eforms provides a fast online form creation process, management, publishing and user submission, thereby providing seamless flow for online applications and related transactions ”

What is EFORMS?

Is an online applications portal designed to create and manage online applications. Specifically, Eforms are application forms that are designed, published, processed and filled online. They affordable, powerful and they save time and cost. With EForms, users do not need to be software experts to build and publish forms online for respondents to fill and make payments.

EFORMS Features

- Generic form authoring and publishing
- Workflow support
- Fine grained access control
- Dynamic report generation
- E-Notifications
- Categorization of forms for easy referencing
- Extensible payment mechanism
- Intuitive user interface

EFORMS Modules

- Forms Creation
- Forms Publishing
- Forms State Management
- Forms Category Management
- User Management
- Audit Trail

EFORMS Users

- Client Administrators
- Applicants / Users

Client Administrators

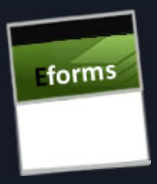
Roles

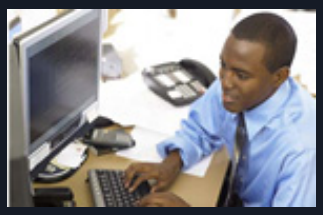
- Build and publish forms
- Manage submissions
- Monitor online payments
- Email Applicants
- Export submissions into formats like XML and CSV for use in other applications

Applicants

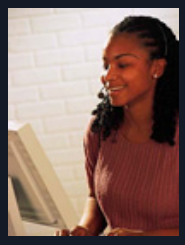
Roles

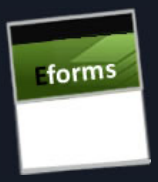
- Access, fill and print forms
- Make payments
- Get Notifications



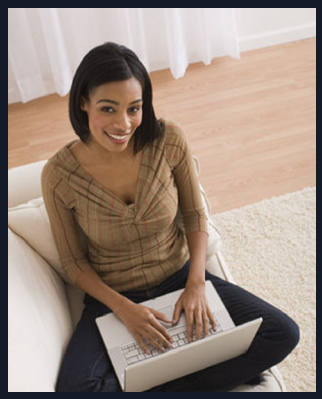


"The great thing about Eforms is that the applicant doesn't have to physically visit the institutions to make an application. In addition, Eforms preserve the look and feel of real paper forms so applicants can work in a familiar environment."





"Best of all, Eforms is user-friendly and requires no special knowledge to use"



EFORMS empowers institutions to:

- Design and publish forms online
- View applicants' submissions and payment information
- Export submitted applications and payment information into various formats like XML, PDF, CSV etc.
- Dynamic Report generation

Benefits to Applicants

- Access to forms published by institutions on the portal
- Forms are filled online
- Automatic notifications when new forms are published
- Online payments can be made for applications

Typical Uses of EFORMS

- Admissions application system by educational institutions
- Event registration system
- Survey / Data gathering system
- Workflow Support System

The EFORMS Advantage (A typical example)

Lets take an example of an institution that wants to give admission to local and international students. The application process may require an applicant to come over to the institution and obtain the form, fill, submit and then pay for the application.

With Eforms, things have been made easier for both the institution and the applicant. Such an admission form (or even any other form) can be created and published online so that interested applicants can easily access the forms from anywhere to fill and make payment online. In addition to this, the applicant can print the completed forms as proof of their application whenever required.

Also, the institutions can keep track of all applications and payments made. Furthermore, several other forms e.g. transcript application form, accommodation form, course registration form etc., when created can be published at the same time the admission form was published.
